

Distribution of Materials Through Students

The District desires to be of assistance in making information of educational or recreational nature available to students and parents. As a result, the Board authorizes the distribution of such materials from nonprofit organizations about activities that have social, recreational, or educational value to students. The Superintendent shall establish appropriate viewpoint-neutral restrictions on the distribution of information to students regarding non-school programs to prevent the exploitation of students by individual groups and to prevent disruption to the educational process. All such materials thus distributed will display the following disclaimer:

“The Bremerton School District neither endorses nor sponsors the organization or activity represented in this document. The distribution of this material is provided as a community service.”

Materials to be distributed should be limited to the basic information necessary to inform. The content should be limited to the subject of the meeting or basic nature of the activity, location, time, date, and the sponsoring nonprofit organization’s name, telephone number, and representative to call for additional information. This policy is not intended to limit the ability of the PTA (Parent Teacher Association) or any other organization directly affiliated with the school from sending information and materials home with students upon approval of the building principal.
