

**Advanced Mathematics: Algebra I Placement  
Parent-Student-School Compact**

Based on the student's performance in Pre-Algebra, the student named below met the requirements to enter into an Algebra I course at West Hills STEM Academy.

---

At the start of the year, the classroom teacher reviewed course expectations, grading policies, and the nature of the Algebra I course. The teacher also reviewed these three challenges that students may face in the course. These challenges included:

- Challenges related to the developmental maturity of the student and the rigorous demands of the high school credit bearing course
- The understanding that the student is in advanced placement and may have missed content knowledge from prior mathematics courses; the student is responsible for seeking assistance for gaps in knowledge
- The understanding of the district's policy regarding advanced placement and honors course, wherein the student is expected to maintain passing scores in order to remain in the advanced course

Based on this understanding, the parent(s) and student wish to enroll in Algebra I.
